GUIDE

Joud Bitar

A focused two-week *reset*.

This isn't a diet. It's two weeks of consistency — the small inputs that move you toward balance: morning light, cold water, a walk, a meal that nourishes.

SECTION I — DAILY, FOR ALL FOURTEEN DAYS

Morning *routine.*

The first hour of the day sets the tone for everything that follows. Keep it simple, keep it consistent.

STEP 01

Light first. Wake up to *daylight.*

Go out or sit next to a window for 10 minutes exposing your body to daylight. Daylight on the skin regulates your circadian rhythm, and helps you wake up energetic.

STEP 02

Hydrate first. Warm water.

Hydrate before anything else. Once you wake up, drink warm water until you feel full.

STEP 03 — DON'T MISS THIS

Eat *breakfast* — mindfully.

Wait at least thirty minutes after waking.

NON-NEGOTIABLE

Four daily *rules.*

- No coffee on an empty stomach.
- Don't miss breakfast.
- Take 60 seconds to lead your day with positive intent.
- Do not miss your physiological stresses
- Get to bed by 10:00–10:30 pm — at least 5 nights a week.

SECTION I — DAILY, FOR ALL FOURTEEN DAYS

Evening *routine.*

The last hour is just as important. Wind it down the same way every night.

The body doesn't switch off on command — it follows cues.

AFTER DINNER

The *wind down* *before sleep*

Three hours of no food before sleep.

- No snack, no vegetables.
- Just water and herbal tea.

DAILY

Walk *60 min*

Daily walk for 60 minutes — you can split 30min between morning and evening if you prefer.

NIGHT

Sleep *by 10:00 – 10:30 pm*

Dinner no later than 8:00 pm.

Get to bed by 10:00 – 10:30 pm — at least five times a week.

Cold shower & *sauna*.

*Let the body learn to regulate its own temperature. **The cold** is to sensitize the cells and push your metabolism. **The heat** is to get rid of toxins. The more toxic load you carry, the weaker your body's defenses become. These stressors will teach the nervous system to come back to centre.*

PRACTICE A

Cold *shower*. “SENSITZE”

<i>Frequency</i>	5 times a week
<i>Duration</i>	4–5 minutes (start with 1 min and work it up)
<i>Temperature</i>	10 to 16 °C
<i>Method</i>	Don't wet your hair — just the body. 2 minutes front, 2 minutes back. Slow deep breaths help a lot.
<i>After</i>	Dry off, wear warm clothes, drink a hot cup of herbal tea — this part is a must.

Don't have cold showers after a workout — it impairs muscle recovery. Don't alternate hot and cold either. Let your body figure out how to regulate its temperature on its own.

PRACTICE B

Sauna. “DETOX”

<i>Frequency</i>	Once a week — please don't miss this
<i>Method</i>	15 min in, 5 min out, 15 min in, 5 min out. If you can do another 10 min, go for it.
<i>Before</i>	A tall glass of water with electrolytes.
<i>After</i>	Warm shower (not cold) — let the body return to homeostasis on its own.
<i>Binder</i>	1 tablet of activated charcoal (Eucarbon) post-sauna, and one in the evening.

Make sure you stool on sauna days to eliminate toxins. You can do with or without the binder.

DAILY MOVEMENT

The *walk*.

60 minutes daily — can be split between 30 min in the morning and 30 min in the evening.

If you can't manage the sauna that week, wear a very warm sweater or winter coat when walking so you sweat excessively, and take the charcoal after. Sauna sweat is preferred, but this works.

Cold Shower *Benefits*

- Cold shower will help improve metabolic signaling
- Activate brown fat, by burning energy to create heat
- Regulate blood sugar more efficiently
- Improve stress tolerance
- Reduce cravings and appetite dysregulation

Sauna *Benefits*

- Support detoxification
- Excessive sweat helps eliminate certain toxins
- Improves oxygen delivery and nutrient transport
- Support lymphatic function
- Support cardiovascular health

SECTION III

01 — 07

The first *week.*

Seven days to settle in. The body is learning a new rhythm — be patient with it. Repeat the menu along side the morning and evening routines for the next 7 days.

Daily menu — *days 1–7.*

WEEK ONE

MORNING

Breakfast

after 60 min of waking

EGGS + VEGGIES

2 eggs with 2 egg whites — omelette with mushrooms, or boiled.

On the side: 1 big cucumber · 1 big carrot · ½ cup sliced bell pepper · ¼ avocado · a handful of berries.

Optional extra — 1 big teaspoon of chia & flax seed soaked overnight in ¼ cup unsweetened coconut or almond milk, with 1 teaspoon vanilla and cinnamon, a handful of strawberry on top.

MID-MORNING

Snack

between meals

No snack. Coffee or herbal tea only — max 2 coffees a day.

You can have one cappuccino with nut milk.

MIDDAY

Lunch

2:00 – 3:00 pm

THE MAIN MEAL

Whatever is cooked for lunch — make sure you cover the below:

- **Salad first** — with apple cider vinegar.
- **Protein** — 150 g (a full palm size).
- **One carb** — from the list (*page 12*).

Finish with 1 cup of peppermint tea.

Not allowed — pasta, bread, freekeh, soya sauce, yoghurt, cheese.

POST-MEAL

straight after

Exactly after the meal: 1 cup of berries — *or* 1 not-very-ripe banana with 1 tablespoon of almond butter.

EVENING

Dinner

7:00 – 8:00 pm

SMALL SALAD

Small salad with one of —

- Tuna
- 100 g chicken
- 100 g fish

NO MEAT.

SECTION IV

08 — 14

The second *week.*

The body has begun to settle. Breakfast moves from eggs to the shake; dinner softens into a bowl of soup. Lunch remains the main meal of the day.

****If you prefer to stick to the egg breakfast option instead of the shake you can do so.***

Daily menu — *days 8–13.*

WEEK TWO

MORNING

Breakfast

after 60 min of waking

THE SHAKE

Shake: ½ cup berries · ¼ avocado · 1 tsp almond butter · 1 tbsp pumpkin seed · 1 tsp sesame seed · 1 tsp sunflower seed · 1 tsp soaked chia & flax · 2 tbsp almond or coconut milk · a small piece of ginger.

Optional: 1 tablespoon of bone broth.

Egg whites only: boil 2–4 egg whites or make an egg-white omelette. You can have protein powder instead.

MID-MORNING

Snack

between meals

No snack. Coffee or herbal tea only — max 2 coffees a day.

You can have one cappuccino with nut milk.
